Cyber Ready, Future Secure

Cyber Ready

Technology moves fast.
Cyber threats are relentless.
We're the trusted experts
in navigating complex regulatory
environments across finance,
healthcare, legal, construction,
NFP, and manufacturing.

Tell me what it is

Reduce breach risk with a cost-saving package that combines Traditional Managed Services ([TMS](#)) and Managed Security ([MSaaS](#)). Bundle and save—get more for less when you purchase together!

Tell me how it will help me

This bundle sets the baseline for modern business security—cost-effective, reliable, and designed to keep your systems running and data protected—all with one trusted partner.

- Help Desk your way – automated for ease, real people when you need them
- Proactive systems management. Reduced risk, improved compliance, faster incident response
- 24/7 SOC protection. AI-powered threat detection and response
- ISO/IEC 27001 Certified. Globally recognised security standards

Cyber Ready, Future Secure

Break it down for me

We offer flexible managed services ensuring seamless operations within your budget.

- Network design and implementation
- Network monitoring and management
- Bandwidth optimisation
- Network security

Hardware Provisioning / Fleet

- Hardware procurement
- Hardware installation and configuration
- Lifecycle management
- Warranty and support

Cyber Ready, Future Secure

Break it down for me

Cyber Ready, Future Secure adapts to your business stage and sector, with flexible add-ons like cyber governance, risk and compliance (GRC) and targeted audits to meet your operational priorities.

Managed Security (MSaaS)

MSaaS (Managed Security as a Service)

Deploy and manage security solutions such as Rocket Cyber (SIEM), ThreatLocker (Application whitelisting), Datto EDR (AV/EDR), Vulscan (Vulnerability Reporting), and third-party patching to ensure comprehensive security coverage.

SIEM Management

Implement and manage SIEM solutions to provide real-time analysis of security alerts generated by applications and network hardware. This includes monitoring, threat detection, and incident response to ensure the security of clients' IT environments.

SOC Escalation

Our Managed Security Operations Center (SOC) continuously monitors your environment for malicious and suspicious activity that evades conventional defences. It operates 24/7/365 with skilled cybersecurity professionals who analyse network, endpoint, and cloud attack vectors to detect and respond to potential security incidents.

Who are we

Virtual IT Group combines world-class IT and cybersecurity solutions that aim to provide your business with a competitive edge. Local roots ensure our approach is real and our impact is personal, while our AI/automation credentials mean we can guide you through your growth agenda as a strategic partner, not a provider.

That is why we are ranked among the world's premiere Managed Service Providers and are renowned for leading the charge in IT and cybersecurity services.

Together, we don't just support and protect your business, we help you achieve your short and long-term growth objectives.
